Research shows us that participation in extra curricular activities in high school gives the student a greater chance of success during adulthood. Recent survey of America's CEOs revealed that over 40% of these individuals participated in extra curricular activities while in high school. We are confident that the athletic program at Crawford County Jr.-Sr. High School will aid in the preparation of those students who choose to participate in our programs. We are also hopeful that the information provided in this brochure will enhance both your child's and your experience with the Crawford County Jr.-Sr. High School Athletic Program.
